DISCLAIMER

The Society of Interventional Radiology (SIR) and the American College of Radiology (ACR) are providing this coding update for educational and information purposes only. It is not intended to provide legal, medical or any other kind of advice. The update is meant to be an adjunct to the American Medical Association (AMA) Current Procedural Terminology (CPT®2026). It is not comprehensive and does not replace the CPT® 2026 Professional Edition Manual. Our intent is to assist physicians, business managers and coders. Therefore, a precise knowledge of the definitions of the CPT® descriptors and the appropriate services associated with each code is mandatory for proper coding of physician service.

Every reasonable effort has been made to ensure the accuracy and thoroughness of this update, but SIR, ACR and its employees, agents, officers, and directors make no representation, warranty, or guarantee that the information provided is error-free or that the use of this update will prevent differences of opinion or disputes with payers. The publication is provided "as is" without warranty of any kind, either expressed or implied, including, but not limited to, implied warranties or merchantability and fitness for a particular purpose. Neither SIR nor ACR will bear any responsibility or liability for the results or consequences of the use of this manual. The ultimate responsibility for correct use of the Medicare and AMA CPT® coding system lies with the user. SIR and ACR assume no liability, legal, financial, or otherwise for physicians or other entities who utilize the information in this update in a manner inconsistent with the coverage and payment policies of any payers, including but not limited to Medicare or any Medicare contractors, to which the physician or other entity has submitted claims for the reimbursement of services performed by the physician.
